PROFESSIONAL SUMMARY

Backend Developer with **1+ year of experience** building scalable backend applications using **Java and Spring Boot**. Experienced in designing **secure REST APIs**, implementing **JWT and Keycloak-based authentication**, and working with **microservices architecture**. Contributed to an enterprise **Vendor Management System (VMS)** including authentication, shift management, and event-driven notification modules using **Apache Kafka**.

TECHNICAL SKILLS

- **Backend:** Spring Boot, Spring Security, REST APIs, Microservices
- **Languages:** Java, SQL, JavaScript, TypeScript, Node.js
- **Frameworks:** Express.js, Angular
- **Security:** JWT Authentication, Keycloak, Role-Based Access Control (RBAC)
- **Databases:** MySQL, MariaDB, MongoDB, PostgreSQL
- **Messaging:** Apache Kafka (Producer & Consumer)
- **Templating:** Thymeleaf, Mustache
- **API Documentation:** Swagger / OpenAPI
- **DevOps:** Git, Docker, CI/CD Pipelines
- **Testing:** JUnit, Mockito
- **Concepts:** SOLID Principles, Clean Code, Design Patterns
- **Tools:** IntelliJ IDEA, VS Code, Postman

EXPERIENCE

Backend Developer

The Baap Company

Dec 2024 – Present

Sangamner, Maharashtra

- Contributed to backend development of an enterprise-scale **Vendor Management System (VMS)** used for workforce and vendor management.
- Designed and developed **scalable and secure REST APIs** using **Spring Boot**.
- Implemented **authentication and authorization** using **JWT and Keycloak**.
- Designed and enforced **Role-Based Access Control (RBAC)** for a multi-tenant platform.
- Developed compliance workflows including **document assignment, submission, and audit tracking**.
- Integrated **Apache Kafka** to enable **asynchronous event-driven notification processing**.
- Implemented dynamic email template rendering using **Thymeleaf and Mustache**.
- Created API documentation using **Swagger (OpenAPI)**.
- Optimized database queries using **MySQL and MongoDB**.
- Developed unit tests using **JUnit and Mockito**.

PROJECTS

Authentication Service Module (VMS)

- Developed REST APIs using **Java and Spring Boot** for login, password reset, and user management.
- Integrated **Keycloak** for centralized authentication.
- Implemented role-based and permission-based authorization.
- Improved API performance through database query optimization.

Shift Management Module (VMS)

- Developed REST APIs using **Node.js** and **Express.js** for workforce shift scheduling.
- Implemented business validation rules for shift assignment.
- Designed shift-user-program mapping functionality.
- Optimized database queries to improve API performance.

Event-Driven Notification System (VMS)

- Developed **Kafka producer and consumer services**.
- Implemented dynamic email template binding using **Thymeleaf**.
- Supported **multi-tenant notification configuration**.

EDUCATION

Bachelor of Computer Applications (BCA)

University of Mysore

2025

India
